Cathy,

This is fine for you to do. We suggest that you document somewhere on the worksheet that this is a released form of the NCPEI test and include where and when the items were retrieved.

Thank you for inquiring.

It means that I will make them into worksheets where the students can test their knowledge by choosing an answer and then get the opportunity to "check their answers."

That way they have an immediate response to their level of knowledge.

Cathy

Hi Cathy,

Your question was forwarded to me. Before DPI provides a response, can you explain exactly what "interactive versions of our test" would look like? We are not sure what that means exactly.

Thank you.

Nancy

Subject: NC Physics EOC samples

My name is Catherine H. Colwell (http://dev.physiclab.org/asp/colwell/resume.aspx) and I maintain a high school physics website called PhysicLab, (http://dev.physiclab.org/default.aspx)

On this website I currently host interactive versions of past NY Regents exams and past MCAT physics exams.

http://dev.physiclab.org/Compilation/NYRegents.aspx

http://dev.physiclab.org/asp/MCAS/

I am writing to see if I may obtain your permission to also post interactive versions of your NC physics materials. Many students (and teachers) throughout the nation appreciate access to vetted questions on high school level physics topics.

All pages will have links provided to view your original postings.

Thank you,

Cathy Colwell
